Career Objective

Motivated and detail-oriented aspiring Web Development Intern with foundational knowledge of Python, Django, React.js, HTML, CSS, and JavaScript. Actively learning to work with real-world codebases, build responsive web interfaces, and collaborate using Git-based workflows. Seeking to grow technical skills while contributing to production-ready web applications.

Technical Skills

- **Frontend:** HTML5, CSS3, JavaScript (ES6 basics), React.js (beginner), Tailwind CSS (learning)

- **Backend:** Python (basics), Django (basics), REST API concepts

- **Version Control:** Git, GitHub (basic workflows, pull requests)

- **Databases:** SQL fundamentals (MySQL, PostgreSQL)

- **Other:** Responsive Design, Basic SEO concepts, Web Accessibility fundamentals

Practical Exposure / Experience

Ndimensionz Solutions Pvt. Ltd   *Dec 2021 – Present*
Application Support Engineer / Junior Developer Trainee

- Gained hands-on exposure to web applications built using Python, Django, HTML, CSS, and JavaScript.

- Assisted in understanding existing codebases and fixing small UI and functional issues.

- Worked with SQL queries to troubleshoot application-level issues and validate data.

- Used Git and JIRA to track issues, manage tasks, and collaborate with development teams.

- Supported testing activities including basic functional and regression testing.

- Developed a strong understanding of production environments and real-world application workflows.

Projects Workedin

- **Web-Based HRMS (Academic Project):** Learned and explored how HR management systems work, including employee data handling, payroll concepts, and reporting features. Gained exposure to frontend-backend interaction using web technologies.

- **AI-Based Recruitment Platform (Concept Project):** Studied the architecture of an AI-driven interview platform with multiple user roles. Learned how React.js interfaces interact with Python-based backend services.

- **ERP System Overview (Academic Exposure):** Gained conceptual understanding of large-scale ERP systems, database-driven applications, and offline-first billing approaches.
